8th Annual Conference
American Council for Medicinally Active Plants (ACMAP)
June 20 – June 23, 2017
Clemson University
Clemson, South Carolina

Speakers from globally recognized research institutions, growers, practitioners and others skilled in healing, share their works with medicinal plants and functional foods. Poster sessions. Student presentation competitions. Field trips and technical tours.

Topics include:

• Plant biotechnology and human health
• Traditional knowledge and healing practice
• Plant bioactives for infectious diseases
• Plants, nutrition and disease prevention
• Cultivation and post-harvest handling of quality assured herbs
• Micropropagation of medicinal plants
• Sustainable harvest and conservation principles for native medicinal species
• Plant bioactives for cancer prevention and therapy
• Plant constituents for obesity and related disorders
• Clinical studies of plant extracts and bioactives
• Functional foods and their bioactive functions
• Molecular approaches to elucidate the biosynthesis of bioactive natural products in plants
• Intellectual property and commercialization of plant products for human health
